

Mr. Sanket Panmand

Phone No.: 8010205145

E-Mail: sanketpanmand14@gmail.com

Profile Snapshot

- Aspiring software engineer seeking a challenging role to leverage my programming skills and passion for deriving actionable insights.
- Proficient in Object-Oriented Programming concepts with exposure to data structures and algorithms.
- Enthusiastic and detail-oriented engineering graduate with a strong foundation in computer science and programming.
- Well-trained and proficient in HTML, C++, Java, REST APIs, and SQL.
- Intermediate-level knowledge of frameworks like Spring Boot, Hibernate, and ReactJS.
- A quick learner with a passion for staying updated on emerging technologies, ready to leverage a solid academic background in an entry-level software development role.

Education

Bachelor of Engineering (BE-CSE)

Savitribai Phule Pune University (2024) – SGPA: 9.70

Higher Secondary Education (HSC)

Maharashtra State Board of Secondary & Higher Secondary Education (2020) – 71.54%

Internship

Software Developer Intern

Bitmap Technology, Pune

Duration: Dec 2023 – June 2024

- Developed and maintained web-based applications, improving software performance and efficiency.

Technical Skills

- **Programming Languages:** Java, Java script.
- **Web Technologies:** HTML, CSS, JavaScript, React JS
- **Database:** SQL, MySQL, JDBC
- **Frameworks:** Spring Boot, Hibernate, REST APIs
- **Tools:** Eclipse IDE, IntelliJ IDEA, VS Code, MySQL Workbench
- **Testing Tools:** Postman

Projects

Online Food Order System (ReactJS, Java, Spring Boot, Hibernate, MySQL) (Duration – 6 Months)

- Developed a web-based application for online food ordering, offering an easy-to-use platform for both admin and customers.
- A food order website was developed using React and Spring Boot, connecting the frontend and backend with Axios for seamless data flow.
- Implemented user roles with React, allowing food owners to manage their category, customers to website and buy the food, and admins to have full control over the site.
- Used Spring Security for authentication, ensuring that each user type has the appropriate access and permissions.

Digital Customer Onboarding (Java, Spring Boot, Hibernate, MySQL, REST APIs, Postman)

(Duration – 3 Months)

- Built a digitized system for banking customer onboarding, enabling secure online account creation for individuals and corporate clients.
- Used Java and Spring Boot for backend logic and integrated MySQL for data storage.
- Developed REST APIs to allow smooth interaction between frontend and backend, with API testing performed via Postman.

Amazon Clone (HTML, CSS, JavaScript, ReactJS) (Duration – 3 Months)

- Developed an e-commerce platform simulating Amazon's features, including product listings and shopping cart functionality.
- Implemented ReactJS for interactive frontend development, ensuring responsive design and a seamless user experience.
- Managed different user roles for browsing and purchasing, with a focus on security and scalability.

Experience

- Working on coding platform like Java, Spring Boot, hibernate, React JS and MySQL.
- Developing and maintained web applications and APIs using the technology stack.
- Managing front-end technologies such as HTML, CSS, and JavaScript & collaborating with UI/UX designers.
- Participated in database design and management, handling both relational (MySQL) and non-relational (MongoDB) databases.
- Perform debugging, testing, and troubleshooting to ensure high-quality deliverables.

Certifications

- Full Stack Java Certification Course.
- Front-End Apps: Web Components.
- System Application and Data Processing.
- Python Certification Course.

Achievements

- President, Computer Engineering Student's Association (CESA), 2023-2024
- Topper in 3rd and 4th year of Engineering

Soft-Skills

- Time Management
- Problem Solving Skills
- Ability to Learn Quickly
